

The first of these is the fact that the
 world is a very large place and
 that there are many different
 kinds of people living in it.
 Some of these people are very
 different from each other and
 some are very similar. This is
 because of the different
 climates and environments in
 different parts of the world.
 For example, people living in
 the tropics are used to hot
 weather and people living in
 the north are used to cold
 weather. This means that
 people from different parts of
 the world have different
 customs and ways of life.
 This is why it is important
 to understand the different
 cultures of the world. We
 can do this by studying
 the history and geography of
 different countries and by
 talking to people from
 different parts of the world.
 This will help us to
 understand the world better
 and to live more peacefully
 together.
