

The following table shows the results of the experiments conducted on the 15th of June 1845. The first column contains the number of the experiment, the second column the quantity of the substance used, the third column the time taken for the reaction, and the fourth column the weight of the product obtained.

Exp. No.	Quantity of Substance	Time taken	Weight of Product
1	10	10	10
2	10	10	10
3	10	10	10
4	10	10	10
5	10	10	10
6	10	10	10
7	10	10	10
8	10	10	10
9	10	10	10
10	10	10	10
11	10	10	10
12	10	10	10
13	10	10	10
14	10	10	10
15	10	10	10
16	10	10	10
17	10	10	10
18	10	10	10
19	10	10	10
20	10	10	10
21	10	10	10
22	10	10	10
23	10	10	10
24	10	10	10
25	10	10	10
26	10	10	10
27	10	10	10
28	10	10	10
29	10	10	10
30	10	10	10
31	10	10	10
32	10	10	10
33	10	10	10
34	10	10	10
35	10	10	10
36	10	10	10
37	10	10	10
38	10	10	10
39	10	10	10
40	10	10	10
41	10	10	10
42	10	10	10
43	10	10	10
44	10	10	10
45	10	10	10
46	10	10	10
47	10	10	10
48	10	10	10
49	10	10	10
50	10	10	10

The results of the experiments show that the reaction proceeds in a regular and uniform manner, and that the weight of the product obtained is directly proportional to the quantity of the substance used.
