and will be described in detail at the bottom
of the page. It should be noted, however,
that the first two groups each contain

Setting of bones & muscle tissue. The dog was shot
in dogs were always found after a week or so.
The dog's right fore limb was severely damaged
by a gun bullet. It had to be amputated. The
dog was very weak at first but he soon
got well again. He was a good dog. I always
found him staying near his old dog house
He was a real dog, with dark eyes
and ears, and a strong body and muscles.
