 m'ayz l'arrib d'ff pason e ffuy en drom e

The first thing which in this last month of the year  
 reflects to the mind of the student of the law is the  
 sun. The sun is the source of life and light, and  
 of the heat which is necessary for the growth of the  
 plants. The sun is also the source of the power  
 which is necessary for the motion of the water in the  
 rivers and the sea. The sun is the source of the  
 power which is necessary for the motion of the air in the  
 winds. The sun is the source of the power which is  
 necessary for the motion of the fire in the flames.
