

reaching 1000 ft. The mountain is  
eaten through by a deep ravine  
and the upper part of the mountain  
is covered with talus and scree.  
The lower part of the mountain is  
covered with a dense forest of  
old growth timber. The timber  
is mostly Douglas fir, Western  
Red Cedar, and Western Hemlock.  
There are also some smaller trees  
such as Western Hemlock, Western  
Red Cedar, and Douglas fir.
