

The first purpose of this paper is to
 examine the various uses of the
 word "justice" in the
 English language. It is
 found in many different
 senses, and it is not
 always clear which sense
 is intended. In some
 cases, it is used to
 denote a quality of
 the mind, as in the
 phrase "a just man".
 In other cases, it is
 used to denote a
 principle of conduct,
 as in the phrase "the
 justice of the cause".
 In still other cases,
 it is used to denote
 a branch of the
 law, as in the phrase
 "the law of justice".
 It is therefore
 necessary to be
 careful in using
 the word, and to
 explain the sense
 in which it is used.
 This paper will
 attempt to do this
 by examining the
 various uses of the
 word in the
 English language.

The second purpose of this paper is to
 examine the various uses of the
 word "justice" in the
 English language. It is
 found in many different
 senses, and it is not
 always clear which sense
 is intended. In some
 cases, it is used to
 denote a quality of
 the mind, as in the
 phrase "a just man".
 In other cases, it is
 used to denote a
 principle of conduct,
 as in the phrase "the
 justice of the cause".
 In still other cases,
 it is used to denote
 a branch of the
 law, as in the phrase
 "the law of justice".
 It is therefore
 necessary to be
 careful in using
 the word, and to
 explain the sense
 in which it is used.
 This paper will
 attempt to do this
 by examining the
 various uses of the
 word in the
 English language.
