

The first part of this paper is devoted to a description of the
 various forms of the genus *Staphylinus* which have been
 recorded from the British Islands. The second part is devoted to
 a description of the new species which I have discovered in
 the course of my researches. The third part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The fourth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The fifth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The sixth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The seventh part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The eighth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The ninth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches. The tenth part is devoted to a
 description of the new species which I have discovered in the
 course of my researches.
