

Introduction

The first part of the book is devoted to a general survey of the history of the subject. It begins with a brief account of the early attempts to explain the phenomena of life, and then proceeds to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.

The second part of the book is devoted to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.

The third part of the book is devoted to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.

The fourth part of the book is devoted to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.

The fifth part of the book is devoted to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.

The sixth part of the book is devoted to a more detailed consideration of the various theories which have been advanced from time to time. The author's own views are gradually introduced, and are fully stated in the concluding chapter of this section.
